Broadblue Power400

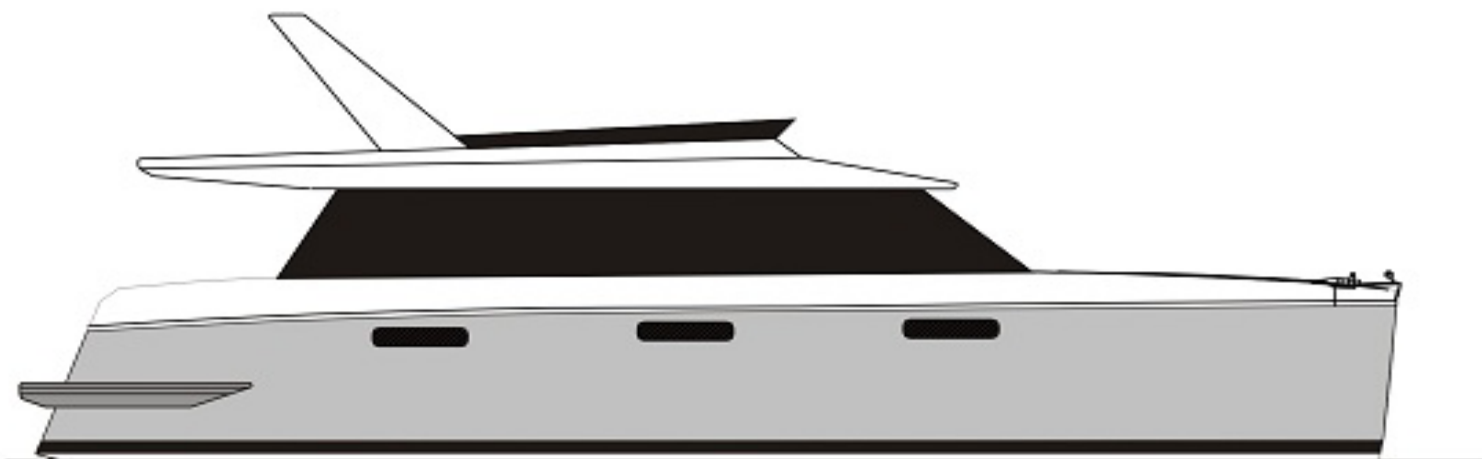

Expect impressive performance and fuel economy.

NEW from Broadblue - remarkably powerful and fuel efficient flybridge catamarans.

These striking and fast boats use lightweight high power diesel engines and full hybrid powerplants to maximise the hydrodynamic form of the specially designed hull.

One World. One Life. One Cat.

www.broadblue.co.uk

The impressive new Broadblue Power400 has been engineered for performance and efficiency, she has powerful deep V planing hulls. The strong, lightweight, hydrodynamic hulls of this catamaran give an exhilarating performance under power but also great fuel efficiency. In fact, the twin 135hp Volvos are not only extremely fuel efficient they also come as standard with IPS drive for easy handling whilst the P400 will use up to 50% less fuel than a Monohull of equivalent size.

The Power400 is also a beautifully stable craft, able to provide both a smooth ride whilst at sea and to sit much more comfortably at anchor than a typical powerboat. She also has a hugely spacious and completely level saloon /galley with luxurious cabinetry and panoramic views, two beautiful double cabins aft with a further double cabin port forward.

The P400 has an enormous flybridge with generous seating, bar facilities and a second helm. Broadblue has been building world-class catamarans since 2001 and the New Power400 joins the existing power and sailboat range, and she is the second in a range of new high performance models.

TECHNICAL SPECIFICATION
