

You Only **Live Once**

BROADBLUE - World Class Catamarans that you can only dream of!

Since 2001 Broadblue has been building 'the best cruising catamarans in the world'. Today they are the only production catamaran builder in the UK- building boats that incorporate the bespoke specification, first class materials, and light, spacious contemporary interiors that have established Broadblue as the premium quality catamaran.

The company, now based on the South coast in Portsmouth and also on the East coast in Southwold, offers three distinct ranges of catamaran – all built to order, and of the very highest quality, and specification.

The Voyager series (V345, V385, and V435) are superlative cruising catamarans. The Power500 series provides impressive performance combined with extraordinary fuel efficiency, and the brand new Rapier series, (first model- Rapier550 in build now) is the company promises – 'the most beautiful high performance catamaran in the world' – easily capable of 20 knots, as well as class leading comfort and space.

Broadblue already has a customer base in the Channel Islands – they are after all the perfect cruising boat, and offer a decidedly economical way to Island hop- because even if used solely under power, the inherent efficiency of a Catamaran, as well as the modestly sized engines, mean that a range of 1000nm (nautical miles) is possible for a modest fuel cost of £200.

Broadblue Voyager435

The Broadblue Voyager435 catamaran has all the space, style, and luxury you expect, plus remarkable fuel economy, even when used solely under power. Step onboard and see why our Cats are attracting so much interest from powerboat enthusiasts – owners who expect to cruise in complete comfort but who have never before considered a catamaran. You have nothing to lose but your pre-conceptions.

Broadblue Voyager345

"Broadblue Catamarans - whichever model you choose, prepare to be amazed because this is sailing at its very best"

Broadblue Voyager345

The Broadblue Voyager345 is the entry level model in the Broadblue range and is designed for fast coastal and inshore passages, with a full offshore capability should the need arise.

This catamaran is a boldly engineered and incredibly space efficient design. Small enough to make a passage through the French Canals, but robust enough for Category A (ocean) RCD status, she also has an amazing 2 metre standing headroom throughout the boat.

Key to the easy handling of the Broadblue Voyager345 is the innovative "sail station" concept, bringing all of the working sheets and halyards to a single forward facing location alongside the helm station. This ensures that one person, including reefing of both the main and headsails, can easily handle the Voyager345.

The spacious accommodation includes two large double aft cabins and a single cabin forward as standard. Incorporating a single cabin amidships on the port side and a saloon conversion for a double berth can extend this.

When combined with the optional second head this allows up to 8 people to sleep aboard and enjoy the facilities of two heads and two showers - all in a 10m catamaran.

The Saloon/Galley is spacious, light and luxuriously appointed. A large, comfortable corner sofa surrounds a natural oak table, and the generously sized galley has ample workspace, and raised shelving, as well as high and low cupboards. Throughout, all round, laminated glass windows, and big skylights offer panoramic views, and add to the feeling of immense space

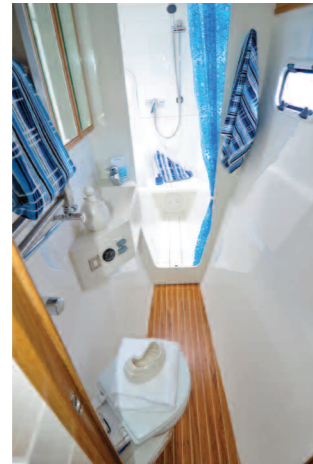

Cockpit - This huge Cockpit with its clever two-tier seating is a revelation in a boat of this size. There is ample space to stand, sit, sunbathe, relax or dine in complete comfort.

High style onboard – just add sea and sunshine for the perfect atmosphere.

Swimming Deck - A first for a Catamaran, yet more luxurious space across the entire width of the boat. Great for swimming, diving and sunbathing.

Head/Shower - Beautifully contoured and fitted with oak framed and mirrored cabinets, a large heated towel rail, (optional) and a walk in separate shower.

Aft Cabin - Assured comfort, space and style with a king sized berth, complete with comfortable upholstered headboard, a natural oak shelf, oak framed storage compartments, generous hanging space and even a small sofa.
